**UP & COMING  
DESIGNERS**

I produce very highly innovative, good quality products, exploring different materials. My design is very much related to fashion using fabrics, shades and integrating various materials such as polypropylene, plaster, plywood, metal and silk screen. Most of my design has been inspired by space travel, aeroplanes, boats and nature. In my latest design I have used different fabrics, dry mounted with a hot press, which I transformed into a lampshade.
